Naufal Akhira

Jakarta, Indonesia | naufalakhira14@gmail.com | linkedin.com/in/naufal-akhira | https://github.com/naufalakhira14-gif

Fifth-semester Data Science student with a strong interest in data analytics and hands-on experience through various Data Science projects. Proficient in Python, SQL, R and Excel, with strong communication skills and a motivation to apply and further develop data skills in a professional environment.

ORGANIZATION EXPERIENCE

Data Science Club – Activist, Human Capital *January 2026 – Present*
BINUS University

- Collaborated with the Human Capital team to organize recurring internal activities aimed at strengthening engagement and bonding among Data Science Club members.
- Planned and coordinated recreational activities, including bonding games and badminton events, from activity preparation to event execution.
- Worked closely with fellow committee members to coordinate event concepts, logistics, and participant activities.

Data Science Club – Outventure Committee, PDD *April 2026*
BINUS University

- Served as a member of the Publication, Design, and Documentation (PDD) division for Outventure, an annual bonding event organized by the Data Science Club.
- Created promotional materials and visual designs to support event communication and publication.
- Documented activities throughout the event through photos and other visual content.

Teach For Indonesia – FUN LEARNING Volunteer *Mei 2025*
BINUS University

- Volunteered in the FUN LEARNING program by teaching early childhood students at PAUD UMI, Palmerah, West Jakarta, for one week.
- Assisted in delivering engaging learning activities tailored to young children.
- Collaborated with other volunteers to create an interactive and supportive learning environment.

EDUCATION

BINUS University – Jakarta, Indonesia *2024 – Present*
Bachelor of Data Science, GPA 3.50/4.00

- Relevant Coursework: Machine Learning, Data Mining, Deep Learning, Database Systems, Statistics, Data Visualization, and Big Data Processing.
- Developed multiple academic data science projects involving data preprocessing, exploratory data analysis, machine learning, and model evaluation using Python and related technologies.

PROJECT EXPERIENCE

Student Placement & Salary Prediction *April 2026*
Python · Scikit-learn · Optuna · Streamlit

- Built a machine learning project to predict student placement outcomes and salary estimates using student-related features.
- Organized the project into modular components for data processing, model development, and application integration, with a Streamlit interface for interactive predictions.

Indonesia E-Commerce Sales & Logistics Analytics *August 2026*
Python · Pandas · Power BI · Excel

- Analyzed and cleaned Indonesian e-commerce transaction data containing 20,848 orders and 31 columns to prepare the dataset for exploratory data analysis and business analysis.
- Developed an interactive Power BI dashboard to visualize sales performance, order status, payment trends, and logistics metrics to support data-driven insights.

Credit Score Prediction — End-to-End Machine Learning Pipeline *June 2026*
Python · Scikit-learn · Streamlit · AWS EC2

- Developed a machine learning pipeline to classify customer credit scores into Poor, Standard, and Good categories using demographic, financial, and credit history features.
- Implemented data preprocessing, model training, and evaluation, and integrated the prediction workflow into a Streamlit application for interactive credit score classification.

Stock Price Prediction Using LSTM *June 2026*
Python · TensorFlow · LSTM · Time Series Forecasting

- Developed baseline and improved LSTM models to forecast stock closing prices using historical data from Alphabet (GOOGL) and Intel (INTC).
- Evaluated forecasting performance using RMSE, MAE, and MAPE to compare model predictions across both stock datasets.

Marketing Campaign & Customer Value Analysis *August 2026*
Microsoft Excel · PivotTable · PivotChart · Data Analysis

- Analyzed customer and marketing campaign data to explore purchasing behavior, customer segmentation, and campaign response patterns.
- Used Excel PivotTables and PivotCharts to summarize customer characteristics and present findings through data visualizations for business analysis.

Bank Marketing Campaign Analysis *Desember 2025*
R · RStudio · R Markdown · Statistical Analysis

- Analyzed bank marketing campaign data using R to explore customer characteristics and factors associated with campaign outcomes.
- Performed data preprocessing and exploratory data analysis (EDA), and documented analytical findings using R Markdown to support data-driven marketing insights.

SKILLS & CERTIFICATION

Technical: Python, R, SQL, Microsoft Excel, Power BI, Pandas, NumPy, Scikit-learn, TensorFlow, Streamlit, Git/GitHub

Soft Skills: Communication, Teamwork, Problem Solving, Event Coordination, Collaboration

Language: Indonesia, Intermediate English

Certifications & Training : Fundamentals of Deep Learning — NVIDIA, March 2026
